RESERVED FOR MINING OPERATORS

The Control Room Network aims to bring together experts in management, monitoring, and optimization of mining operations through exchanges on the most advanced technologies and methods. This network is a unique opportunity for collaboration to develop best practices in integrating control rooms in the mining sector.

SCEN4RIOS

What the Control Room Network offers you

VALIDATION BY NETWORKS OF EXPERTS

The validation service is designed to evaluate the relevance of potential innovation and collaborative projects. For over 10 years, we have relied on the expertise of our Expert Networks to validate the relevance of all projects before their launch. This service provides in-depth analyses and comprehensive market studies, aiming to identify market opportunities and challenges to maximize the commercial success of new technologies in the mining industry.

MINEMAP

The MINEMAP service is the mapping of mining operation processes conducted over the past 10 years by the **MISA Group**. Through information gathering from multiple communication channels, all experts will have access to 330 mining maps, from exploration to environmental monitoring. This service provides comprehensive mapping and optimization of mining operation processes, aiming to improve efficiency, safety, and sustainability in the industry.

TECHNOLOGY SHOWCASE

The Technology Showcase offers visibility on in-situ tests and progress of ongoing projects. Follow proof of concepts and stay informed about the results obtained by projects conducted by the **MISA Group**. You will find milestone summaries, opportunities for in-situ tests in your mines, as well as reports from other ongoing tests and the possibility to participate in them as well.

BEST PRACTICE

The **MISA Group's** Best Practice service is dedicated to identifying and disseminating best practices in the mining industry, drawing on the knowledge and experience of experts in the field. The proposed content offers optimization insights. For over 10 years, this service has been contributing to the safety, efficiency, and sustainability of mining practices by promoting high standards and innovative techniques.

SPECIAL PROGRAM

TRAINING AND EDUCATION:

In collaboration with the **Institut national des mines du Québec**, each network will benefit from 20 to 30-minute information sessions, twice a year. These sessions will address key topics related to teaching and training, tailored to the specific needs of control room operators. The **Institut national des mines du Québec** will inform you about new skills to meet tomorrow's challenges.

COMMITMENT:

**NO REGISTRATION
FEES***

**2 TO 3 ANNUAL VIRTUAL
MEETINGS FOCUSED ON
SPECIFIC OPPORTUNITIES**
(4 hours each)

**ANNUAL HYBRID
MEETINGS**
(4 hours each)

INNOVATIVE PROJECTS:

A portfolio of projects that brings together investments in mining innovation

- Access continuous **technology watch** by following the evolution of the MISA project portfolio.
- Attend **technical presentations** by innovative SMEs from Quebec and Canada.
- Share your **operational challenges** and **best practices** with your peers.
- **Direct** available capital in mining innovation towards **opportunities relevant** to you and the industry.
- **Participate** in the advancement of **Quebec mining technologies** on a national and international scale.
- **Stay informed** about certain updated skill profiles necessary to work in control rooms.

COLLABORATIVE PROJECTS:

Be an active member of the programming

The MISA approach allows:

- **Prioritizing** common issues,
- **Reducing** financial risk,
- **Optimizing** the impact of public funding,
- **Mobilizing** the best scientific and technological expertise,
- **Sharing** research results.

Funding for collaborative projects is considered on a case-by-case basis depending on the interest of network members.

The **MISA Group**, the Resource in Mining Innovation.
